

Design and Technology.

Within DT, pupils will learn the skills and technical knowledge needed, to be able to design and make a variety of products; this will be done through a range of creative and practical activities. At White Court we aim to provide children the opportunity to consider and work in a variety of contexts, ranging from their home, our school grounds and local industries. Throughout both key stages, children will participate in the evaluation of their own and existing products and be given the chance to modify their work. Pupils are given the chance to actively take part in activities involving cooking and nutrition both in and outside of school. They will develop their understanding of nutrition and healthy eating and gain the life skills needed for their future.
